PROJECT NAME	PROJECT – SMART SOLUTION FOR RAILWAYS
MAXIMUM MARKS	2 MARKS

## **Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.NO.	PARAMETER	DESCRIPTION
1.	Problem	•Smart Solutions for railways is designed to reduced
	Statement (Problem to be solved)	the work load of the user and also the use of paper
		and also provides the live location of the train.
		●In their busy schedule as fast roaming world public in
		need of online booking process. The queues in
		front of the ticket counters in railway stations have
		been drastically increased over the period of time.
		●Ticket reservation through counter is not sufficient
		and convenient for the passengers. The passengers
		are struggling to get tickets in the time from ticket
		counters. So they like to switch over online ticket
		booking.
2.	Idea / Solution description	•A webpage is designed in which the user can book
		tickets and will be provided with a QR code which
	acset iption	will be shown to the ticket collector and the ticket

		collector will be scanning the QR code to get the
		passenger details.
		●The webpage also shows the live locations of the
		train by placing a GPS module in the train. The
		location of the journey will be updated
		continuously in the webpage.
		●The booking details of the user will be stored in the
		database which can be retrieved anytime.
3.	Novelty /	●A QR code will be provided by the webpage to the
	Uniqueness	user which will reduce the paper work.
		•All the booking details of the customers will be
		stored in the database with a unique ID and they
		can be retrieved back when the Ticket Collector
		scans the QR Code.You can also view interactive
		seat map.
4.	Social	•The booking tickets is made easy to use and it is also
	Impact / Customer	reliable and no need to go to station for
	Satisfaction	booking tickets and the transaction process is also
		made easy.
		One can manage online ticket booking and apply for a
		cancellation in case of change in plans.
		●The customer will be notified on email as well as cell
		phone on all confirmation and cancellations.
5.	Business	●With this solution - By using this application, the
	Model (Revenue Model)	customer can schedule their destination, view
		availability of the seat, view interactive seat map
		and select their seat for their convenience.
		Moreover, it enables your customers to organize
		trips and daily shuttles effortlessly and it also
		reduces the carrying of tickets. The customer can

		,	
		also watch the current location of the train.	
		●Without this solution – they have to travel to the	
		station to book tickets and also have to carry their	
		tickets to show to ticket collector.	
6.	Scalability	1. No need of taking print out.	
	of the Solution	2. Counter ticket has to be handled with care, but	
		SMS on mobile is more than enough.	
		3. You are becoming environment friendly and	
		contributing for greener planet by ignoring	
		printout.	
		4. No need of taking out wallet and showing	
		your ticket to TTR, just tell your name to TTR	
		that you are passenger with a valid proof.	
		5. While booking counter ticket you had to carry	
		cash and while booking E- ticket you are	
		paying through online directly from bank	
		which makes work more easy for you.
